

Use DocuNECT™ to Extend D5/D6

www.portfordsolutions.com

Overview

DocuNECT is an electronic document capture, indexing, and distribution software platform that can provide a central hub for electronic document capture. DocuNECT allows content to be captured, processed to extract index values, and then distributed into Documentum D5/D6.

Capture

Capture and organize content from:

- ✓ Electronic Forms
- ✓ Multi-Function Scanner/Copier Devices
- ✓ Fax Servers
- ✓ Email (POP3, IMAP and Microsoft Exchange)
- ✓ File Folder or Network Locations
- ✓ FTP and Secure FTP Sites
- ✓ Web Sites
- ✓ Document Management Systems
- ✓ DocuNECT Virtual Print Driver
- ✓ DocuNECT Desktop Capture
- ✓ DocuNECT Microsoft Windows Explorer and Outlook integration

Index

Extract business information by:

- ✓ Automatically using Business Rules to extract information from the content, location or filename of documents of documents (Text, PDF, XML and Microsoft Office)
- ✓ Barcodes on either TIFF or PDF image documents
- ✓ Databases or External Business Applications
- ✓ Distributed indexing by routing documents within batches to specific users or groups

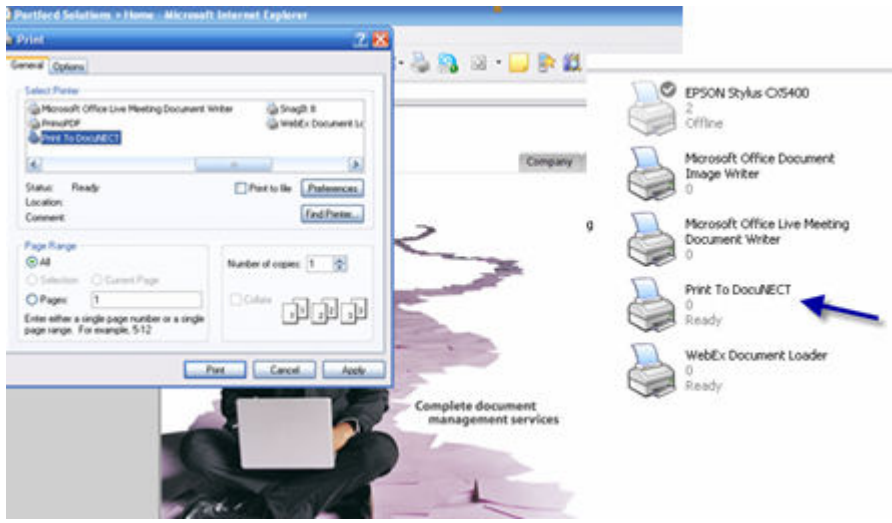

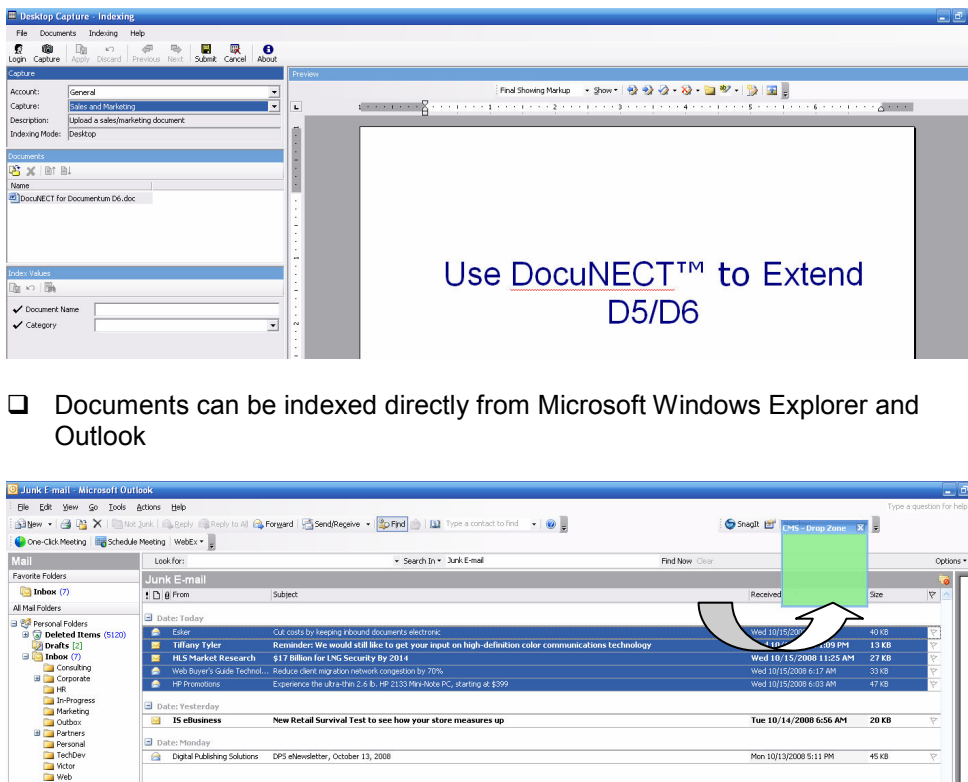

Distribute

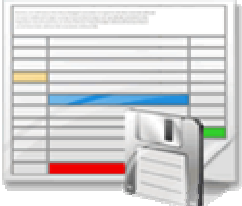

Release to a document management repository for storage, access and distribution:

- ✓ Document Management or Capture System, such as **Documentum's ApplicationXtender and D5/D6**
- ✓ DocuNECTOnline™
- ✓ FTP or Secure FTP Site
- ✓ Folder or Network Location
- ✓ Email
